My favorite elements

Our custom-made green onyx coffee table

"An essential piece in our new space is absolutely our green onyx coffee table by Marbera. It was made specially for us – designed to hold one of our glass bubbles – and it's absolutely amazing. The glass and the marble go so well together, and the coffee table is a great addition to our candy universe. I'm dreaming of getting a similar table at home."

Abstract brass installations

"As part of our newly presented collection Sweet Illusion, I had a vision in my head of making abstract body parts in brass and hanging them in unexpected places in the space. Inspired by the wonderful world of circus – with acrobats and dancers – the brass sculptures are playful, and make fantastic additions to the interior."

Inside Mardah's candy-colored studio, the pastel couch is a favorite hangout spot for the team, and is central to team meetings and work drinks

My dream couch

"Ever since I can remember, I've dreamed of having a huge couch – a conversation couch that can fit a small village. I made some very detailed 3D drawings and called our dear carpenter Thomas, who made it a reality. It easily fits our whole team of nine people, and it has become our favorite hangout spot – we use it for meetings, Zoom calls and after-work drinks. It's probably my best investment so far!"
